**BERG FlatGround Champion Green / Grey 430**

Art. No.	Product Description	EAN-code	Diameter (A)	Height (B)
38.14.07.00	BERG FlatGround Champion Green 430	8715839060522	4,3 m	0,15 m
38.14.03.00	BERG FlatGround Champion Grey 430	8715839060539	4,3 m	0,15 m

The unique BERG FlatGround Champion is the first completely buried trampoline which is noiseless and offers optimal jumping comfort. This trampoline is also provided with an unique construction which is strong, multifunctional and easy to assemble. Because the trampoline is completely buried, it fits in every garden and getting on and off has never been so easy. The FlatGround Champion has passed the heaviest tests in the BERG Testlab with flying colors. The BERG FlatGround Champion is the trampoline to match your perfect garden.

BERG FlatGround Champion:

**Frame:**

- The special tube construction of the frame is unique and patented.
- The frame has a height of 120 mm, a width of 40 mm and has a thickness of 2 mm.
- The frame is the foundation of the whole trampoline, all parts are attached to it.
- The large surface area of the frame in contact with the sides of the hole ensures the trampoline is very stable and safe.
- The height of the tube prevents the ground on the sides from caving in and preserves the shape of the hole.
- The frame is highly rust-resistant caused by the special double coating on the tube. The tubes are first provided with a durable zinc-layer and then covered with a beautiful black powder coating layer.
- The frame can be assembled easily and it is firmly connected by 2 bolts per segment.

## BERG FlatGround Champion Green / Grey 430

### Jump mat:

- This unique Airflow jump mat with 50% more airflow ensures optimal jumping comfort.
- Because of the extra airflow, there is less air resistance and the jumping force is used optimally. The durable jump mat is made from woven polypropylene.
- The jump mat contains special spring-eyes for the **TwinSpring System**.
- The loops for the strong metal spring eyes are thoroughly joined to the jump mat with no less than 8 rows of stitching.

### Protective padding:

- The BERG FlatGround Champion is available with a green or grey protective padding.
- The padding is fixed with a special band which ensures the padding stays horizontal at all times. Because of this the padding doesn't flap while you are jumping which gives a noiseless jumping experience. Because it stays horizontal the air can escape easily resulting in less resistance and great jumping comfort. The trampoline has a padding with a 30 mm thick foam layer.
- The padding is 400 mm wide which ensures a good protective overlap of the springs.
- The foam layer is made from water-repellent "closed cell foam".
- The foam is covered by a thick water-resistant top layer of enforced PVC.

### Springs:

- The FlatGround Champion is equipped with the innovative **TwinSpring System**. This system consists of a large number of obliquely placed springs, which provide a unique jumping characteristic for the trampoline.
- The BERG TwinSpring Gold (from the Goldspring series) is used in the TwinSpring System.
- The BERG TwinSpring Gold is a long and slender spring. The spring is completely galvanized with a durable rust-resistant layer of zinc that covers the complete surface of the spring.
- Installing the springs has never been easier with the user-friendly installation system. The jump mat is equipped with 4 red spring-eyes and the round top frame (top rail) of the trampoline has 4 locations that are marked red. Install the springs in between the red locations of the top rail and the red spring-eyes and the jump mat is always installed properly.

## Product

Product Description	No. of springs	Entrance height of trampoline	Frame tube height	Frame tube width	Frame tube thickness	Max. user weight	Test weight
BERG FlatGround Champion	128	0 cm	120 mm	40 mm	2,0 mm	120 kg	600 kg

## Packaging & Logistics

Product Description	Weight (incl. boxes)	In the packaging		Packaging 1 (without padding)		Packaging 2 (padding)
